

RF320PM PTFE Glass Fabric

■ Product description

RF320PM is a porous PTFE coated glass fabric.

RF320PM has a very low resin absorption capacity and then keep breathing during the whole cure of the part when directly laid up on the surface of the part. It peels off without any effort and keeps safe of delamination light composite structure .

RF320PM can be used when lot of volatiles need to be extract during the cure even at high temperature and high pressure.

■ PROPERTIES

Maximum Use Temperature	320°C (608°F)
Fabric	PTFE
Fabric Thickness	0.08mm(0.003")
Colour	Brown, Coffee
Fabric Weight	84g/m ²
Stretch Strength	MD≥330 N/50mm TD≥310 N/50mm

■ AVAILABILITY&PACKAGING

Standard Size	3.3'or 4.1'*109yard
---------------	---------------------

■ Notes

Storage: In its original packaging in cool and dry place

Avoid direct sunlight

No skin irritation problems, no other special requirement
