

WF150B Polyester Bleeder & Breather Fabrics

■ Product description

WF150B is a light non woven felt Polyester bleeder & breather fabrics, widely used in low temperature and middle temperature during debulking/compaction cycles under vacuum only.

WF150B helps to breath air outside the vacuum bag and volatile. Its low weight limits its use as both breather and bleeder functions as the same time. Some trials must be performed in such case prior to select this product. Black fiber helps in detection of fiber left on the part.

WF150B should not be used at neither at high temperature nor high pressure.

Always use a release film between the part and WF150B.

■ PROPERTIES

Maximum Use Temperature	205°C(401 °F)
Fiber	100% Polyester
Solidity	100%
Standard Weight	150g/m ²
Standard Thickness	3mm(0.12")
Colour	Black

■ AVAILABILITY&PACKAGING

Standard Size	1.52m*100m(5.0'*109yard)/roll
Incision	As Request
Packaging	Polyester Film Bag

■ Notes

Storage: In original packaging in a dry and cool place.

No skin irritation problems, no other special requirement.
