

## WF330 Polyester Bleeder & Breather Fabrics

### ■ Product description

WF330 is a non woven polyester felt widely used in vacuum bagging process for cures in oven and autoclave up to 205°C ( 401 °F ) and 7 bars max.

His medium weight allows to breath air out from the vacuum bag and bleed excess of resin. In case of large excess of resin two or more plies could be used.

WF330 is the result of our R&D research and specific fiber used makes this breather one of the best in the market.

Always use a release film between the part and WF330.

### ■ PROPERTIES

Maximum Use Temperature	205°C(401 °F)
Fiber	100% Polyester
Solidity	100%
Standard Weight	330g/m <sup>2</sup>
Standard Thickness	5.5mm(0.217")
Colour	White

### ■ AVAILABILITY&PACKAGING

Standard Size	1.52m*100m(5.0'*109yard)/roll
Incision	As Request
Packaging	Polyester Film Bag

### ■ Notes

Storage: In original packaging in a dry and cool place.

No skin irritation problems, no other special requirement.
