

WF300N Bleeder & Breather Fabrics

■ Product description

WF300N is a non woven Nylon/polyester felt widely used in vacuum bagging process for cures in oven and autoclave up to 232°C (450 °F) and 7 bars max.

WF300N is an improved version of our WF330 exhibiting higher performances at high temperature and high pressure.

Mix of Nylon and polyester fibers avoids the breather to collapse under temperature and pressure and helps in keeping a good vacuum during autoclave cycles.

Always use a release film between the part and WF300N.

■ PROPERTIES

Maximum Use Temperature	232°C(450°F)
Fibre	Nylon66 and Polyester
Standard Weight	300g/m ²
Flame Resistance	Standard

■ AVAILABILITY&PACKAGING

Standard Size	1.52m*50m(5.0'*109yard)/roll
Incision	Can Be Customized
Packaging	Polyester Film Bag

■ Notes

Storage: In original packaging in a dry and cool place.

No skin irritation problems, no other special requirement.
