

LG230 Sealant Tape

■ Product description

LG230 is a high temperature sealant tape suitable for autoclave applications up to 232°C (450 °F) .

LG230 exhibits excellent characteristics and is the result of a long research performed in our R&D department.

LG230 is easy to use for making vacuum bag at room temperature, excellent at high temperature and high pressure achieving safe cures in autoclave. After cures it peels cleanly from the tool surface.

■ PROPERTIES

Maximum Use Temperature	232°C (450°F)
Colour	Yellow
Solids	100%
Flammability	Non ammal

■ AVAILABILITY&PACKAGING

Standard Size	12.7mm*3.2mm*10m (0.04"*0.126"*11yard)
Standard Box Contents	24 Rolls
Also Available In Cord	20 Boxes In One Pallet

■ Notes

Not toxic, not irritant, and not injurious to skin.

Storing in original packaging with temperature between 5°C --25°C

Shelf time: 12months Material must be at stored.
