

VI100E Flow Mesh

■ Product description

VI100E is a 100g/m² PP extruded infusion media. This media is commonly used to infuse all size of parts in Wind energy and Marine Markets.

VI100E has a grid shape and is used to allow resin feeding and spreading over the component. The PP material is compatible with all kind of resin, polyester, vinylester and epoxy as long as it operates up to 140°C (284 °F) .

■ PROPERTIES

Maximum Cure Temperature	140°C (284 °F)
Material	PP
Solid State	100%
Fabric Weight	100g/m ²
Thickness	0.9mm(0.035")
Structure	Extruded Grid-shape
Colour	Light green

■ AVAILABILITY&PACKAGING

Standard Size	1.2m*50m(3.9'*55yard)
Packaging	Polyester Bag

Other size on request

■ Notes

Store in cool, dry place, and avoid direct sunlight

No skin irritation problems

No other special requirement.
