

Silicone Hose

■ Product description

High tear resistance, durability Silicone vacuum hose already become an industrial standard product, can last for hours when using in Autoclaves and Ovens up to 200°C (392 °F) .

Sting inside eliminated the possibility of break under high pressure, special designed brass end can couple with flow preventer joint assemblies. Damage hose can be repaired.

■ PROPERTIES

Operating Temperature	200°C(392 °F) , Can be used under higher temperature{250°C(482 °F)}, but service life will be shorter
Operating Pressure	1.2MPa
Threaded Ends	Male thread 1/4" BSP standard (other size on request)
Size	Inside diameter 7.9mm(0.311"), external diameter 18mm(0.709")
Colour	Transparency, red, and blue

■ Notes

Hose length on request, no other special request.
